PROFESSIONAL SUMMARY

Passionate and dedicated Full Stack Development fresher with hands-on knowledge in HTML, CSS, Tailwind CSS, JavaScript, React, and Django. Enthusiastic about building complete web applications from front-end to back-end. A quick learner who is continuously improving technical skills and seeking an entry-level opportunity to contribute, grow, and develop expertise in a professional environment.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+)

Backend: Django, Django REST Framework (DRF), RESTful API Design

Frontend: React.js, React Router, React Hooks, Context API, HTML5, CSS3, Bootstrap, Tailwind CSS, Fetch API

Database: SQLite, Django ORM

Gen AI / LLM: Google Gemini API, LLM Integration, Prompt engineering

Gen AI Tools: ChatGPT, Claude, Antigravity

Tools: Git, GitHub, Postman, VS Code

INTERNSHIP EXPERIENCE

ALO INFO TECH — *Front-End Developer Intern*

04 Jul 2025 – 19 Jul 2025

- Built a desktop portfolio website from scratch gaining hands-on experience in HTML5, CSS3, JavaScript, and Bootstrap with structured layout and styling
- **EmailJS API:** Integrated EmailJS API to enable direct contact functionality, allowing visitors to send messages without a backend server
- **UI Design Concepts:** Practiced core UI design concepts including navigation, section layouts, and visual styling

MATT ENGINEERING SOLUTIONS — *Full-Stack Developer Intern*

march 2026 – Jul 2026

- **Music Streaming App:** Built a full-stack music streaming web application with 42 songs across 3 categories
- **User Authentication:** Implemented Signup/Login system using Django REST Framework with SQLite database
- **Music Player Controls:** Developed play/pause, next/previous, and auto-play functionality using React state management
- **React Router:** Integrated React Router for client-side routing across Login, Home, and Search pages
- **CORS Configuration:** Configured CORS headers for secure React-Django communication

PROJECTS

Personal Portfolio Website — *HTML5 + CSS3 + JavaScript + Bootstrap*

- **Desktop UI Design:** Built a structured desktop layout using Bootstrap grid and custom CSS, optimized for laptop and desktop screen viewing
- **Interactive Features:** Implemented smooth scrolling, sticky navbar, animated hero section, and hover effects using vanilla JavaScript

Music Streaming Web Application — *React + Django + SQLite*

- **User Authentication:** Implemented Signup/Login system using Django REST Framework with SQLite database for secure credential storage
- **Music Player Controls:** Developed play/pause, next/previous, and auto-play functionality using React state management and component lifecycle
- **Full-Stack Integration:** Configured CORS headers and React Router for secure client-server communication and smooth client-side navigation across Login, Home, and Search pages.

PolyDoc AI — Multilingual Document Analysis Tool — Django + Gemini API

- **PDF Processing & Extraction:** Implemented document upload and text extraction pipeline using PyMuPDF to parse user-uploaded PDFs for downstream AI analysis
- **RAG-Based Retrieval:** Built a Retrieval-Augmented Generation pipeline using vector embeddings to chunk and index document content, enabling accurate, context-aware responses instead of relying on raw context windows
- **AI-Powered Insight Generation:** Integrated Google's Gemini LLM via API to analyse extracted document content and generate structured summaries, key insights, and Q&A responses
- **Multilingual Output System:** Built a language-selection feature allowing users to receive AI-generated output in their preferred language, using Gemini's translation/generation capabilities dynamically based on user input

EDUCATION

Bachelor of Engineering — Electronics and Communication Engineering	2022 – 2026
Stella Mary's College of Engineering, Tamil Nadu CGPA: 7.77
