Python Full Stack Developer | Django | React.js | REST API

PROFESSIONAL SUMMARY

Dedicated Python Full Stack Developer with hands-on experience in Django, Django REST Framework (DRF), React.js, and RESTful API development. Completed 3 internships covering backend development, frontend engineering, and full stack application delivery. Proficient in building scalable single-page applications (SPA), implementing JWT authentication, and designing relational database schemas using Django ORM. Strong understanding of software development life cycle (SDLC), version control with Git, and cross-browser responsive UI design. Seeking an entry-level full stack or backend developer role to deliver impactful, production-ready solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+)
Backend: Django, Django REST Framework (DRF), RESTful API design, JWT Authentication (SimpleJWT), APIView, CRUD operations
Frontend: React.js, React Router, React Hooks, Context API, HTML5, CSS3, Tailwind CSS, Material UI, Axios, Fetch API
Database: SQLite, Django ORM, relational data modeling, ForeignKey relationships
Tools: Git, GitHub, Postman, VS Code, GitHub Copilot, JSON Server, SPA architecture, component-based architecture, responsive design, cross-browser compatibility

INTERNSHIP EXPERIENCE

Kadamba Technologies – Python Developer Intern

09/2024 – 11/2024 | Chennai

- Developed backend-to-database connections using Django and Django REST Framework (DRF), gaining hands-on experience in RESTful API design and database integration.
- Enhanced backend workflows through systematic debugging, unit testing, and code optimization, improving application performance and reliability.
- Implemented CRUD operations and managed relational data models using Django ORM with SQLite.

J Clicksolutions – Frontend Developer Intern

04/2025 – 06/2025 | Nagercoil

- Built responsive, cross-browser compatible UIs using HTML5, CSS3, JavaScript (ES6+), and React.js, applying modular component-based architecture and reusable design patterns for scalability.
- Developed single-page applications (SPA) with React Router, integrating RESTful APIs via Axios and Fetch API; optimized state management with React Hooks and Context API for seamless, dynamic user experiences.
- Collaborated in an Agile development environment, participating in code reviews and iterative feature delivery.

JCS Infotech – Python Full Stack Developer Intern

09/2025 – 11/2025 | Nagercoil

- Delivered full stack web applications using React.js (SPA architecture, client-side routing, Axios/Fetch API integration, JSON Server) for frontend and Django with DRF for scalable backend modules.
- Designed and implemented RESTful APIs with proper endpoint structure, request/response handling, and error management, ensuring efficient data flow and maintainability.
- Applied full software development life cycle (SDLC) practices including requirement analysis, development, testing, and deployment.

PROJECTS

Railway Management System – Django + React.js | Full Stack

02/2026 – Present

- JWT Security:** Integrated SimpleJWT for stateless token-based authentication, securing all RESTful API endpoints and ensuring robust, scalable client-server communication.
- RESTful API Development:** Designed and implemented scalable APIs using Django REST Framework (DRF) and APIView, supporting full CRUD operations for Stations, Trains, and Routes.

- **Relational Data Modeling:** Architected complex database schemas using Django ORM with ForeignKey and related_name attributes to manage many-to-one relationships efficiently.
- **Tech stack:** Python, Django, DRF, React.js, SQLite, JWT, Git, Postman.

Spotify Clone – React.js + Tailwind CSS | Frontend

- **Responsive UI:** Built a fully responsive music streaming UI using React.js and Tailwind CSS with modular component-based architecture and React Router for efficient client-side routing.
- **API Integration:** Integrated RESTful APIs using Axios and Fetch API; managed application state with React Hooks and Context API for songs, playlists, and user interactions.
- **CRUD Operations:** Implemented CRUD operations for songs, playlists, and likes with a responsive UI compatible across mobile and desktop screen sizes.
- **Tech stack:** React.js, Tailwind CSS, JavaScript (ES6+), React Router, Context API, Axios, JSON Server.

EDUCATION

Bachelor of Engineering – Computer Science Engineering

2022 – 2026

Annai Vailankanni College of Engineering, Tamil Nadu | CGPA: 8.0 / 10
